Education

St.Joseph's College Of Engineering - OMR **Aug. 2024 – May 2028**

Bachelor of Engineering in Computer Science And Engineering CGPA : 8.53 *Chennai, TamilNadu*

Technical Skills

Languages:Java, Python, C, JavaScript, SQL
Frameworks and Tools: React,js, Node.js, TensorFlow, PyTorch, Scikit-Learn, Selenium, Git, Docker, Streamlit, MongoDB, Docker
Data Science and ML: NLP, NLTK, SpaCy, LSTM, Random Forest, SVM, XGBoost, Matplotlib, QGIS, Neo4j, Transformers, OCR
AI Agent: LangGraph, CrewAI
Web Development: HTML , CSS , Tailwind . Javascript , React.js, Babylon.js , Three.js
Simulation and AI: Digital Twin models

Experience

Hariharan Enterprises **June 2026 – present**

AI and Automation Intern *Chennai, TamilNadu*

- Built a document intelligence agent using LangGraph to extract structured fields (JSON) from vendor PDF submissions for automated tender analysis.
- Engineered an eligibility analysis agent that compares extracted vendor data against tender criteria to automatically flag compliance gaps, plus a reverse auction simulation agent with tool-calling capabilities for autonomous bid evaluation
- Powered multi-agent orchestration with an open-source LLM (Llama/Mistral via Ollama), reducing manual procurement evaluation time across multi-document bid packages.

Maxwin Multitec Solutions **June 2025 – July 2025**

Front End Developer Intern *Chennai, TamilNadu*

- Designed and deployed the company's production website using HTML, CSS, and JavaScript for an Aadhaar-enabled biometric and smart-education solutions provider.
- Built and integrated a 24/7 LLM-powered customer support chatbot to handle product queries and customer interactions autonomously.
- Enabled intelligent query handling and automated response workflows, reducing manual support overhead for the business.

Projects

Telegram Sentinel | *Python, Flask, Telethon, MongoDB, Scikit-Learn, Transformers, EasyOCR, NLP* **February 2025**

- Implemented a multi-layered detection pipeline combining Machine Learning, NLP, Semantic Search, OCR, phishing URL analysis, and wallet blacklist verification.
- Built a cumulative risk scoring engine and automated Telegram alert system for high-risk fraudulent messages.
- Achieved 92% precision on 2,000+ Telegram chat records by leveraging semantic similarity matching and AI-driven scam detection techniques.

CrimeLink - AI | *Python, Neo4j, NLP, Scikit-Learn, XGBoost* **March 2025**

- Integrated predictive analytics models to detect crime patterns and support data-driven crime prevention strategies.
- Built interactive crime hotspot and risk assessment dashboards to identify high-risk locations and suspect profiles.
- Implemented graph-based network visualization to analyze relationships between suspects, crime types, locations, and weapons.

SURAKSH AI | *Digital Twin, Machine Learning, Swarm Intelligence* **September 2025**

- Developed an AI-powered defence digital twin integrating drone swarms, logistics optimization, environmental prediction, and acoustic gunshot detection.
- Built real-time 3D battlefield visualizations using Babylon.js with live simulation updates through Flask and Socket.IO.
- Integrated ML-based weather forecasting and gunshot classification models to enable adaptive risk assessment and decision support.

Achievement

- Smart India Hackathon Winner SIH - 2025.
- Top 12 team in Tamil Nadu Police Hackathon 2024
- ACM codher'25 Runner Up among 750+ team across India.
